CHAPTER IV

STATISTICS OF HIGHER EDUCATION, 1935-36¹

PART I. GENERAL FINDINGS AND INTERPRETATIONS

PROBLEM OF COMPILING STATISTICS OF HIGHER EDUCATION

For the statistical compilations found in the following pages the data were gathered by means of two questionnaires--one on faculty, students, and degrees; and the other on receipts, expenditures, and property. These questionnaires were sent to all the 1,706 institutions listed in Office of Education Bulletin 1936, No. 1, "Educational Directory: 1936." This directory list is made up as follows:

- A. Universities, colleges, and teachers colleges:
 - 1. Accredited by a national or regional accrediting association.
 - 2. All State-supported institutions of collegiate grade.
 - 3. Four-year institutions not accredited by any agency, but enrolling at least 100 resident college students in regular session and graduating at least 10 students annually.
- B. Independent professional and technological schools:
 - 1. Accredited by professional associations or approved by State universities or State departments of education.
 - 2. Not accredited by any agency but enrolling at least 25 resident students of college grade in regular session and graduating at least 5 students annually.
- C. Junior colleges and normal schools:
 - 1. Accredited by a national or regional accrediting agency.
 - 2. Not accredited by any agency but:
 - (a) Requiring high-school graduation for entrance.
 - (b) Offering 2 years of work of college grade.
 - (c) Enrolling 50 or more resident students of college grade in regular session.

(It should be noted also that questionnaires were sent to and replies received from institutions of college grade in the outlying parts of the United States, but these institutions are not included in the general summaries. Reports were also received from approximately 25 institutions not listed in the 1936 directory. These reports, involving possibly 3,000 students, are not included in the summaries here presented.)

Of the 1,706 questionnaires sent out, usable returns on the personnel blank were received from 1,584 institutions. Not all of these institutions supplied data on every item. In these instances, and also in the

¹Prepared under the supervision of Emery M. Foster, Chief, Division of Statistics; major statistical editing and tabulating done by Margaret J. S. Carr and Maude Farr, statistical clerks.

44 instances where institutions did not report for 1936, data for 1933-34 were used. The personnel data therefore include 1,628 institutions. Usable reports on finances were received from 1,443 institutions; inserting 1933-34 data for the institutions not replying in 1935-36, results in the inclusion of data on receipts from 1,541 institutions, on expenditures from 1,540, and on property from 1,362.

While it is impossible to indicate exactly the significance of the omission of schools from the tables for one year which are included for another year, the following statements may help to give some indication of the types of schools failing to report.

First, of those failing to report on the personnel blank, very few were among the publicly controlled institutions or the large privately controlled universities, colleges, and professional schools. Practically all were highly specialized technical schools such as conservatories of music, theological seminaries, law schools, schools of optometry, or were among the junior colleges and normal schools intimately associated with public high schools or if under private control lately raised from the status of preparatory schools. The total enrollment of all these schools probably does not exceed 5,000 students.

The omissions from the list of institutions supplying financial data while outnumbering those failing to supply personnel data consist quite largely of these same groups of schools, namely, privately controlled technical or professional schools and junior colleges maintained by city or district school authorities. Another type of school failing to supply financial data is the college which occupies quarters jointly with a motherhouse, an orphanage, a Y. M. C. A., or some other institution of a philanthropic character. It is clear that data on the higher education unit of an organization of this sort are very difficult to segregate. The difficulty is accentuated when a large amount of nonsalaried service is involved in conducting the institution's work.

Furthermore, some institutions occupy rented quarters whose cost or value they have no way of knowing. Examples of this type are the professional schools of a proprietary character, particularly those operating in downtown office buildings in the urban centers. These schools, while they often supply excellent data on financial operations, have little or no usable data on property.

Considering all of these omissions, however, it is conservative to estimate that if all institutions reported their financial data the national totals of receipts and expenditures here given would not be increased by more than 3 percent, and those on value of property would not be increased by more than 5 percent.

In studying statistical tables on higher education with a view to determining trends the factor of comparability of items and of totals from one biennium to another looms large. This factor is affected by (1) the number of institutions reporting the various items at different times, (2) variations in interpretation of the items in the questionnaires, and (3) changes made by the Office of Education in the questions asked or in the manner of editing the returns received.

The first of these matters was studied carefully in connection with the Biennial Survey of Education for 1932-34 and the conclusion was reached that "even though the number of institutions reporting may vary from biennium to biennium comparisons of totals from one biennium to another are not seriously invalidated by that fact."

As an indication that the increase in the number of institutions reporting in 1935-36 over the number reporting in 1933-34 does not vitiate comparisons seriously, it may be noted that the increase is made up largely of the following:

(a) Publicly controlled normal schools, 31, and teachers colleges, 9. These are accounted for by 43 county normal schools which reported in 1935-36 and not in 1933-34, and by the change of several institutions from normal schools to teachers colleges.

(b) Publicly controlled junior colleges, 35. These are mostly small institutions maintained by public-school boards of education.

(c) Privately controlled junior colleges, 58. These are mainly academies and preparatory schools which are becoming junior colleges. Their enrollments are small.

These three groups account for 124 of the total increase of 210. The remainder are principally professional schools. For example, music schools reporting increased from 70 to 97; schools of commerce and business from 95 to 110; schools of fine arts from 26 to 34. Thus it will be clear that the difference in numbers reporting does not represent to any considerable extent inclusions one year and omissions another year of collegiate institutions of the usual 4-year arts and sciences type. Nor does the addition of a considerable number of institutions in 1935-36 greatly invalidate comparisons of totals for the two bienniums because the additions are almost wholly institutions having small enrollments.

Variations among institutions in their usage of items contained in the questionnaires still constitute a major source of difficulty in statistical compilations in higher education. The Office of Education goes carefully over all reports and edits them with a view to uniformity of interpretation, but in spite of progress toward uniformity it is recognized quite frankly that certain differences in recording data still exist among the institutions.

Changes in phrasing the various items of a questionnaire are made from time to time in order to reflect changing educational conditions. When any such change is made, the data returned in reply to the revised questionnaire must be carefully interpreted in terms of both the old and the new phrasing if a break in the trends is to be avoided. For example, the single question formerly used relating to the number of persons receiving the Ph. D. degree on examination no longer brings in complete data on the number of persons receiving the doctorate on examination. Obviously, this question has had to be reframed so as to provide for the number of persons receiving other doctorates (Ed. D., Sc. D., etc.) and the compilations must be interpreted accordingly.

Finally, although the identical item may be carried in a questionnaire for several years, a change in tabulating the replies may cause an apparent fluctuation in the final results. To illustrate, a report may be called for on the total amount of Federal money received. Clearly, the results of any compilation based on this question will depend on whether temporary allotments from emergency funds are included in the statements or not.

NUMBER AND DISTRIBUTION OF INSTITUTIONS REPORTING

Totals by States.--The number of institutions of various types in the different States which reported personnel data is shown in table A. In addition to showing the total number of institutions by States, this table reveals other facts of interest. For example, some States concentrate their publicly controlled college and university work (excluding teachers colleges) in one institution. This is true of even such populous States as California, Illinois, Minnesota, and Wisconsin. Other States maintain several publicly controlled colleges and universities. Note, for example, that Georgia has 5; Michigan, 5; North Carolina, 8; Ohio, 8; Oklahoma, 5; South Carolina, 7; Texas, 8; and Virginia, 6. This latter group of States illustrates the effects of two tendencies: First, the building up of more than one State college in a State; and, second, the more recent development of municipal colleges and universities.

Another fact revealed by table A is that the public junior college is found in only half of the States. Half the public junior colleges are in four States: California, Iowa, Oklahoma, and Texas.

It will be noted, further, that eight States (California, Illinois, Iowa, Michigan, New York, Ohio, Pennsylvania, and Texas) report a total of 60 or more institutions each. At the other end of the scale we find Nevada and Wyoming reporting one institution each.

Professional schools by States.--Many of the 1,628 institutions reporting maintain professional schools or departments as part of their organizations. The distribution of the more common types of these schools is shown in table B. The total number of professional schools classified is 1,376, not counting 122 "other" schools.

Hasty generalizations should not be made from this table. The fact, for instance, that no school of music is listed in North Dakota, no school of home economics in California, no school of fine arts in Delaware, does not mean that these subjects are not offered in these States. It means only that there are no separately organized and administered schools such as make reports to this Office. In many instances professional curricula in various fields are offered in colleges of arts and sciences. These professional curricula are not included in this tabulation.

HISTORICAL SUMMARY, 1900-1936

Table C shows the trend in college enrollments as compared with the trend in population from 1900 to 1936.

It will be observed that whereas less than one-third of 1 percent of the total population in 1900 were enrolled in college, more than nine-tenths of 1 percent were so enrolled in 1936; that whereas a little more than 4 percent based on the number of persons 18 to 21 years of age were enrolled in college in 1900, nearly 13 percent of this number were enrolled in 1936. The actual and percentage increases during the 36-year period are shown in the lower section of the table, where a 69-percent increase in total population and a 59-percent increase in population 18 to 21 are accompanied by an increase of more than 400 percent in actual enrollment in institutions of higher education.

This table reveals a fact too often lost sight of. In comparison with

HIGHER INSTITUTIONS

the increase in total population, the increase since 1900 in the number of young people 18 to 21 years of age has been considerably less. It is more significant to relate the increase in student enrollment to the increase in the numbers of young people than to the increase in total population. In 1900 there was 1 college student to 24.9 young people 18 to 21; whereas in 1936 this number had increased to 3.2, or 1 college student to every 7.8 young people in the same age group.

High-school and college enrollments.--In connection with the rapid increase in college enrollments, the question is often asked whether an increasing proportion of high-school graduates is going on to college each year. In spite of the fact that the increase in enrollments in higher education since 1900 has been very marked, it has been much less marked than the increase in high-school enrollments. The percentage of high-school graduates entering college has been decreasing since 1900.

TABLE C.--POPULATION AND STUDENT ENROLLMENT IN HIGHER EDUCATION, 1900 TO 1936

Year	Population ¹			Percent student enrollment is of	
	Total	Ages 18 to 21	Student enrollment in higher education ²	Total	Population ages 18 to 21
				popula- tion	tion
1	2	3	4	5	6
1900.....	75,994,575	5,930,765	237,592	.31	4.01
1905.....	84,219,378	6,583,109	264,345	.31	4.02
1910.....	91,972,266	7,335,453	355,213	.39	4.84
1915.....	99,342,625	7,339,624	403,558	.41	5.50
1920.....	105,710,620	7,343,794	597,857	.57	8.14
1930.....	122,775,046	9,026,741	1,100,737	.90	12.19
1932.....	124,974,000	9,164,338	1,154,117	.92	12.59
1934.....	126,826,000	9,301,935	1,055,360	.83	11.35
1936.....	128,429,000	9,439,532	1,208,227	.94	12.80

INCREASES, 1900 TO 1936

Number.....	52,434,425	3,508,767	970,365	.63	8.79
Percent.....	69.00	59.16	408.53	203.23	219.20

¹Population for intercensal years (1905, 1915, 1932, 1934, and 1936) estimated by the Bureau of the Census; column 3 by Office of Education.

²Resident students of college grade, regular session (September to June) only, duplicates omitted.

If we compare the enrollments in all types of secondary schools, including preparatory departments in colleges, with the collegiate-grade enrollments in colleges and universities, including teachers colleges and normal schools, we find the following:

In 1900 the ratio was 1 college student to each 2.9 secondary-school students. In 1910 the ratio was 1 to 3.1; in 1920, 1 to 4.2; in 1930, 1 to 4.4; in 1934, 1 to 5.8; and in 1936, 1 to 5.3.

From this it will be noted that the ratio of secondary-school students to college students doubled in 34 years, but has declined slightly in the biennium from 1934 to 1936, due to the relatively low collegiate enrollments in 1934. In other words roughly speaking only half as large proportions of high-school students go into college now as was the case in 1900.

Rise of the junior college.--One of the most interesting developments in the field of higher education in recent years has been the growth of the junior college. Statistics on this type of school have been collected by this Office since 1918 only, but this period represents the era of their greatest growth. Table D sets forth data on this point.

TABLE D.--NUMBER OF JUNIOR COLLEGES AND THEIR ENROLLMENT, 1917-18 TO 1935-36

Year	All schools reporting		Publicly controlled		Privately controlled	
	Num-ber	Enroll-ment	Num-ber	Enroll-ment	Num-ber	Enroll-ment
	1	2	3	4	5	6
1917-18.....	46	4,504	14	1,367	32	3,137
1919-20.....	52	8,102	10	2,940	42	5,162
1921-22.....	80	12,124	17	4,771	63	7,353
1923-24.....	132	20,559	39	9,240	93	11,319
1925-26.....	153	27,095	47	13,859	106	13,236
1927-28.....	248	44,855	114	28,437	134	16,418
1929-30.....	277	55,616	129	36,501	148	19,115
1931-32.....	342	85,063	159	58,887	183	26,176
1933-34.....	322	78,480	152	55,869	170	22,611
1935-36.....	415	102,453	187	70,557	228	31,896

Here it will be noted that junior colleges have increased rapidly both in numbers and in enrollment. In 1935-36 the numbers enrolled in junior colleges equalled 17.0 percent of all undergraduate enrollments in arts and sciences, including arts and science divisions in teacher-training institutions. The publicly controlled junior colleges in 1936 enrolled on the average 377 students each while the average enrollment of the privately controlled junior college is 140.

Other trends.--For other trends reference is made to table 1, which gives a historical summary of certain items of general interest for institutions of higher education from 1899-1900 to 1935-1936. It is in two parts, part 1 relating to universities, colleges, and professional schools, and part 2 relating to teachers colleges and normal schools. Since the forms used for collecting data for later years are not identical with those used up to 1929-30, table 1 should be studied in connection with table 2 rather than as an independent table.

A number of interesting facts are revealed in part 1 of table 1. First, preparatory departments are decreasing in enrollments, there being fewer than half as many students in the preparatory departments in 1936 as in 1900.

Second, the ratio of baccalaureate and first professional degrees to

the enrollments in collegiate, professional, and graduate departments was 16.3 percent in 1900, but had dropped to 11.7 percent in 1936. This change is accounted for in part by the increase in graduate degrees and in part by an increase in the length of many of the curricula leading to first degrees. Probably, too, the change may be accounted for in part by an increase in the percentage of students who leave college before graduation, although it must be acknowledged that no studies have been made which clearly establish this fact.

Third, while honorary degrees have increased between 1900 and 1936, the rate of increase is much less than is true of earned degrees, either undergraduate or graduate.

Fourth, of earned degrees, the number of graduate degrees increased more than 10-fold between 1900 and 1936, the doctor's degree (a part of the graduate degrees) 8-fold, and the baccalaureate or first professional degree, 4.5-fold. The increase in graduate degrees is indeed striking, the number in 1936 being more than 21,000, or 76 percent as many as were the baccalaureate and first professional degrees in 1900.

In part 2 of table 1 it may be noted that in teachers colleges and normal schools both teaching staff and students decreased in numbers after 1929-30. The sharpest drop was in the graduates of nondegree teacher-training courses, showing the rapid elimination of the less-than-four-year curricula.

Although the enrollments in teachers colleges decreased between 1930 and 1936, the number of baccalaureate and first professional degrees increased sharply during the same period.

FACULTY, STUDENTS, AND DEGREES, 1935-36

Table 2, gives a general summary of staff, resident students of college grade, and degrees conferred at institutions of higher education during the year 1935-36. The institutions are also classified according to type of control, curricular offering, and level of work offered.

Faculty.--The 1,628 institutions in the country required the equivalent of more than 110,000 full-time staff members, including administrative officers, teachers, extension and research workers, and other professional employees, but not including clerical or custodial help. This represents an increase over the 1933-34 report, both in number of institutions reporting and in number of persons employed.

Resident instruction as distinguished from extension instruction and research claimed the services of 71,472 men and 26,670 women, or 98,142 persons in all. (These figures are not reduced to a full-time basis.)

These included 40,873 employed in publicly controlled institutions and 57,269 in institutions under private (including church) control. Of the number reported, 92,580 were in work of collegiate grade; 4,931 were reported as critic teachers; and 2,740 were teaching secondary-school students. The figures reveal that 2,109 teachers were counted twice in these three groups--collegiate, critic and secondary teachers, thus showing that they divided their time among the three types of teaching.

Table E shows the changes in total numbers of teachers conducting resident classes of college grade from 1925-26 to 1935-36.

TABLE E.--RESIDENT INSTRUCTIONAL STAFF (ABOVE SECONDARY GRADE), 1925-26 TO 1935-36

Year	Increase over		
	previous report		
	Number	ber	cent
1	2	3	4
1925-26.....	70,674	6,675	10.4
1927-28.....	76,080	5,406	7.6
1929-30.....	82,386	6,306	8.3
1931-32.....	88,172	5,786	7.0
1933-34.....	86,914	1-1,258	1-1.4
1935-36.....	92,580	5,666	6.5
Decrease.			

The number of staff members in 1934 and in 1936 engaged in services other than the regular resident teaching carried on by institutions of higher education is shown in table F.

TABLE F.--STAFF ENGAGED IN SPECIAL WORK OF VARIOUS SORTS, 1933-34 AND 1935-36

Type of work	1933-34	1935-36
1	2	3
Summer session, 1933 and 1935.....	24,790	29,055
Correspondence work.....	3,371	3,388
Extension class instruction.....	4,740	6,015
Agricultural and home economics extension.....	1,750	2,166
County, home, and club agents.....	4,254	5,816
Agricultural experiment station staff.....	2,938	3,069
Other research workers.....	1,691	1,276

It will be noted that the service showing the greatest increase for the biennium is the county club work, including county agents, home demonstration agents, and 4-H club agents. The staff of county workers is greater than the combined staffs of the agricultural and home economics extension services and the agricultural experiment stations.

A percentage analysis, by sex, of the staff members of the different types of institutions follows in table G.

From table G it will be noted that the ratio of men to women in the teaching staffs varies greatly according to the type of institution. While the number of women staff members is a little less than one-third the number of men in publicly controlled colleges and universities, and a little more than one-third of the number of men in the privately controlled colleges and universities, women far outnumber the men in the staffs of teachers colleges and normal schools, and somewhat outnumber

the men in all the non-degree-granting institutions taken as a group.

The question is frequently asked whether the ratio of men to women staff members has changed greatly in recent decades. By reference to a comparable table for 1890 it is found that the women constituted 20.9 percent of the staffs of all colleges and universities taken as a group (excluding teachers colleges and normal schools). For 1936, the comparable figure is 25.5 percent. This gain in the percentage of women college teachers may well be placed side by side with the fact that women are gaining on the men in the number of graduate degrees earned. (See table 1.) While the number of graduate degrees granted to men increased from 1900 to 1930 6.6-fold, the number granted to women increased 19-fold, or nearly three times as fast.

TABLE G.--PERCENTAGE ANALYSIS OF STAFF BY TYPE OF SCHOOL, CONTROL, AND SEX, 1935-36

Total.....	53.7	46.3	100.0	48.6	51.4	100.0	74.5	25.5	100.0
	(9,404)			(7,573)			(1,831)		

Students, total enrollments.--The 1,628 institutions carried in this compilation enrolled a total of more than 1,200,000 resident students of above secondary grade during the regular session (September-June) 1935-36, and more than 370,000 for the summer session of 1935. Table H shows that the total enrollment in the regular session has increased 290,765, or 31.7 percent in the past 10 years, although the increase has not been continuous or regular.

Percentage of men and women students.--Table I divides enrollments by percentages between men and women in the various classes of institutions. The ratio, all institutions taken together, is approximately 3 men to 2 women. Considering the fact that women were admitted to institutions of higher education only such a short time ago this ratio is quite remarkable.

TABLE H.--RESIDENT COLLEGE ENROLLMENTS IN ALL INSTITUTIONS OF HIGHER EDUCATION, 1925-26 TO 1935-36, SUMMER SESSIONS EXCLUDED

Year	Enrollment	Increase over previous report	
		Number	Percent
1	2	3	4
1925-26...	917,462	94,399	11.5
1927-28...	1,053,955	136,493	14.9
1929-30...	1,100,737	46,782	4.4
1931-32...	1,154,117	53,380	4.9
1933-34...	1,055,360	1-98,757	18.6
1935-36...	1,208,227	152,867	14.5

Decrease.

Certain facts in table I are worthy of attention. First, the students in publicly controlled institutions outnumber those in privately controlled institutions when all types of institutions are included. This is the first time in the history of higher education in the United States when the majority of collegiate students were attending publicly controlled institutions. In universities, colleges, and professional schools, excluding teachers colleges and normal schools, the enrollments in publicly controlled institutions are seen to constitute 44.8 percent.

TABLE I.--PERCENTAGE ANALYSIS OF RESIDENT COLLEGE ENROLLMENTS, BY TYPE AND CONTROL OF INSTITUTION AND BY SEX, 1935-36

Item	All institutions reporting			Universities, colleges, and professional schools			Teachers colleges and normal schools			
	Pub-lic	Pri-vate	All	Pub-lic	Pri-vate	All	Pub-lic	Pri-vate	All	
	1	2	3	4	5	6	7	8	9	10

Women.....	20.3	19.6	39.9	15.0	21.8	36.8	60.1	2.7	62.8	
Total.....	48.6	51.4	100.0	42.2	57.8	100.0	96.3	3.7	100.0	
	(1,088,177)			(960,307)			(127,870)			
Non-degree-granting:										
Men.....	35.5	10.6	46.1	38.2	12.0	50.2	19.5	2.6	22.1	
Women.....	35.7	18.2	53.9	30.7	19.1	49.8	65.4	12.5	77.9	
Total.....	71.2	28.8	100.0	68.9	31.1	100.0	84.9	15.1	100.0	
	(120,050)			(102,453)			(17,597)			

and in privately controlled institutions 55.2 percent. The comparable figures for 1921-22 with teachers colleges and normal schools excluded was 35.7 percent attending publicly controlled institutions. The shift to the publicly controlled institutions is thus seen to be rapid.

Second, in universities, colleges, and professional schools as a group, the ratio of men students to women students is slightly more than 3 to 2. In the teachers colleges and normal schools the ratio is slightly more than 1 man to 2 women.

Third, when table I is compared with the corresponding table in the 1933-34 report, an increase in the proportion of men enrolled in teachers colleges and normal schools is shown. In 1933-34, 33.2 percent of the students in schools of this type were men; in 1935-36 the corresponding percentage was 35.4.

There are certain other facts brought out in table 2 concerning enrollments which should be mentioned. First, the enrollments in professional schools are approaching the numbers enrolled in arts and sciences. Comparisons based on the 1936 enrollments may be seen at a glance in the following tabulation:

Students	Enrollments in	
	Colleges of:	
	arts and sciences	Professional schools
1	2	3
Undergraduate men.....	328,729	336,763
Undergraduate women...	272,973	190,459
Graduate men.....	24,356	24,211
Graduate women.....	16,992	14,012

Considering men students only, it will be noted that the enrollments in professional schools exceed the enrollments in arts and sciences. The majority of women are attending arts and sciences.

(It should be borne in mind when interpreting the above figures, that all undergraduate enrollments in colleges of arts and sciences are counted as arts and sciences students in the tabulations even though some of the students may be pursuing a professional curriculum, such as commerce and business offered by the liberal arts colleges. If such students were added to the ones enrolled in professional schools, the differential in favor of professional enrollments would be greater than stated above.)

Second, between 1934 and 1936 the increase in graduate enrollments in professional schools was 6,117 while the comparable figure in arts and sciences was 2,652. This rapid increase in graduate enrollments in professional schools is striking evidence of the fact that professions are being served by more and more men and women who have studied beyond the first professional degree. It is obvious, also, that the amount of research work carried on in the professional fields is rapidly increasing because the graduate students in the professional schools, including the professional departments in the university-wide graduate schools, commonly include in their programs research problems. On the other hand, the

increase in graduate professional students probably reflects the present trend toward graduate professional degrees which represent less research work than is customarily true for graduate arts and sciences degrees.

Third, it may be surprising to note that when publicly controlled institutions are compared with privately controlled ones, the enrollments in graduate professional schools exceed graduate enrollments in arts and sciences in the privately controlled ones, but fall notably below them in the publicly controlled ones. That is, in publicly controlled institutions graduate work in arts and sciences predominates over graduate work in professional curricula. This is true in spite of the fact that the ratio of graduate men students to graduate women students is markedly higher in the publicly controlled institutions than in the privately controlled ones. (See table 2.)

TABLE J.--ESTIMATED NUMBER OF FRESHMEN IN INSTITUTIONS OF HIGHER EDUCATION, 1931-32, 1933-34, AND 1935-36, BY TYPES OF INSTITUTIONS

Type of institution	1931-32 ¹		1933-34 ²		1935-36 ³

Totals.....	336,997	29.20	307,690	29.15	366,734	30.35

¹Based on 91.38 percent of undergraduate enrollment reported.

²Based on 91.70 percent of undergraduate enrollment reported.

³Based on 93.67 percent of undergraduate enrollment reported.

Number of freshmen.--Table J presents estimates of the total numbers of freshmen in institutions of higher education in 1931-32, 1933-34, and 1935-36. The numerical estimates are based on answers from institutions having well over 90 percent of the total undergraduate enrollment for each year, but the percentages used in the table are calculated on this

basis so as to approximate the actual total freshmen students divided by the total enrollment (undergraduate and graduate). By "freshman" is meant a student pursuing his first year above a 4-year high-school course.

Here it is seen that the percent of the total student body enrolled in the freshman class remains fairly stationary throughout the period, but that it fluctuates somewhat in certain types of institutions. A fairly regular but small increase among the publicly controlled degree-granting universities, colleges, and professional schools is noted.

(Attention should be called to the difference in percentages between this table and corresponding estimates appearing in the Biennial Survey of Education for 1932-34. The earlier percentages were calculated on the undergraduate enrollment, whereas those appearing in this report are based on the entire enrollment.)

The most significant fact revealed by table J is that in the group of universities, colleges, and professional schools, the percent of freshmen in the total enrollment has declined almost to 25. This means that students in longer-than-four-year curricula plus transfer students received from other institutions—notably junior colleges—just about balance the drop-outs. These institutions in the category of universities, colleges, and professional schools, are coming to be less of the 4-year college type, but more of the senior college and professional school type.

Closely related to the above fact is the large number of freshmen in junior colleges and normal schools. Of all freshmen entering college in 1935-36, 18 percent entered junior colleges or normal schools.

An expansion of this table is presented in table K, wherein the numbers of freshmen in publicly and in privately controlled institutions in the several States are estimated. No estimate of this sort is available for years prior to 1935-36.

From this table, it will be noted that the freshmen are 32.92 percent of the total enrollments in publicly controlled institutions, but only 27.32 percent of total enrollments in privately controlled institutions. This difference is significant, and probably means that publicly controlled institutions, in comparison with privately controlled ones have a larger proportion of students in less-than-four-year curricula, or a larger proportion of students who drop out before completing any curriculum, or have a lesser proportion of students in advanced professional and graduate curricula.

There are certain variations among the States to which attention may be called. In New York State, for example, only 18.19 percent of students in publicly controlled institutions and 20.73 in privately controlled ones are freshmen. In Montana, the corresponding percentages are 42.78 percent for publicly controlled and 49.01 percent for privately controlled, more than twice as large. The institutions in New York State in general stress the more advanced aspects of collegiate, professional, and graduate work to a far greater extent than do the institutions in Montana. On the average, students in Montana are not doing work of the same collegiate level as are students in New York State. Comparable differences among other States are clearly evident from the table.

The above variations need to be kept in mind when consideration is being given to such questions as student enrollments per capita of popula-

TABLE K.—ESTIMATED NUMBER OF FRESHMEN BY STATE AND BY CONTROL OF INSTITUTION, 1935-36

State	Total number of freshmen 1/	Publicly controlled institutions		Privately controlled institutions

1/ Difference between this total and that carried in tables J and 2 due to dropping of decimals.

tion in the several States, costs per student in higher education in the several States, and migration of students from State to State.

Students in other types of courses.--The enrollment figures so far discussed do not include the following: 66,232 collegiate and 14,286 non-collegiate students in correspondence work; 185,287 collegiate and 32,156 noncollegiate students in extension work; 41,441 persons taking short courses, usually of not more than a week in length; 29,051 secondary pupils (not in training schools); and 34,071 secondary and 61,464 elementary pupils in training schools attached to institutions which train teachers. Further details of these enrollments will be found in table 9.

Earned degrees.--Slightly more than 143,000 persons received the baccalaureate or the first professional degree in 1935-36; more than 18,000 the master's degree or a comparable advanced degree in engineering; and the doctorate was conferred on 2,770 persons. Percents of change from 1933-34 are: Baccalaureate and first professional, 5.1 percent increase; master's, a negligible increase; and doctor's, 2.1 percent decrease. (See tables 1 and 2.)

When degrees in professional schools in 1935-36 are compared with those granted in 1933-34, some rather striking changes are noticeable. When professional school enrollments for the 2 years are brought into the comparison, these changes appear all the more striking, some professions showing an increase in students, but a decrease in degrees granted. Examples of this are in dentistry, where an increase of 1.5 percent in students contrasts with a decrease of 7.3 percent in degrees, and in law, where an increase of 0.9 of 1 percent in students contrasts with a decrease of 8.0 percent in degrees. (See table 6.)

Honorary degrees.--The total number of honorary degrees reported in 1935-36 was 1,347. This is 5.2 percent more than in 1933-34, when 1,280 were reported.

The doctorate was as usual the most popular honorary degree, 1,239 being of this designation. Twenty-four different types of doctorate were conferred; the four most popular being the LL.D., the D.D., the Sc.D., and the Litt.D. This order has remained constant since 1927-28. For the five bienniums prior to 1927-28 the same doctorates were the most popular, but the D.D. consistently outnumbered the LL.D.

Fifteen varieties of honorary master's degrees were conferred on 96 persons, the M.A. and the M.S. being the most common.

Twelve persons received other honorary degrees: Five the A.B., one the Ph.B., two the C.E., one the M.E., and three were reported as honorary degrees without specification.

FINANCES, GENERAL SUMMARY

While in student enrollment, colleges and universities were at the depression low in 1934, the drop in income in 1934 was even much more pronounced than the drop in enrollments. Therefore, when comparisons are made between 1934 and 1936 in items of receipts or expenditures for higher education account must be taken of that fact. Significant increases for the biennium may mean only an approach to the predepression level.

A commendable increase over previous bienniums in the number of institutions reporting financial data is due in part to the report of the National Committee on Standard Reports in Higher Education and to the Fi-

nancial Advisory Service set up in the American Council on Education to promote the use of the recommended forms by the colleges. The number of institutions reporting on the income items increased 13.6 percent to 1,541, on the expenditures items 16.1 percent to 1,540 and on the property items 7.3 percent to 1,362. In general the added institutions are small, and the fact that they are added does not modify the total amounts in any of the items by anything like a comparable percentage. As a matter of fact, the total receipts reported by the larger number of institutions in 1935-36 were only 11.6 percent greater than the receipts for the smaller number of institutions in 1933-34. During the same 2 years, the expenditures for educational and general purposes increases 13.6 percent and for capital outlay, 60.1 percent.

There is ample evidence to show that the increases in these items when identical institutions are used in the computation are almost as large as the ones here reported.

RECEIPTS

(a) From public funds.--Receipts from public sources for all institutions reporting totaled \$133,868,398. This may be compared with \$142,861,675 reported as total receipts in 1933-34, and with \$199,641,930 in 1931-32.

(b) From student fees.--Receipts from student fees (for matriculation, tuition, laboratory and library fees and other instructional purposes) amounted in all institutions reporting to \$158,134,025. This represents an increase of 14.4 percent over the 1933-34 total of \$138,257,350. In 1931-32 the corresponding figure was \$150,649,047.

Student fees in 1935-36 constituted 16.2 percent of the total receipts of publicly controlled institutions, and they amounted to 49.5 percent of the total receipts of privately controlled institutions.

(c) From endowments.--Income from endowment came to a total of \$60,090,075 for all institutions reporting in 1935-36. It constituted 2.4 percent of the receipts of publicly controlled institutions, but accounted for 22.9 percent of the total in institutions under private control.

(d) From gifts and grants.--Receipts from private gifts and grants in 1935-36, were: For current and capital purposes, \$37,115,240; for increase of endowment, \$47,038,548; total (omitting minor items not compiled) \$84,153,788. Corresponding items for 1933-34 were: Current and capital purposes, \$27,467,860; for increase of endowment, \$27,477,963; total, \$54,945,823. Percents of increase for the biennium are: Current and capital funds, 35.1; endowment funds, 71.3; total, 53.2.

As might be expected, the bulk of private gifts to higher education went to institutions under private control, nearly \$70,000,000 going in this direction. Of special interest, however, is the shift in the share going to publicly controlled institutions. In 1929-30 these schools received 6.3 percent of the total of all private gifts and grants reported; in 1931-32 their share was 7.1 percent; in 1933-34 it rose to 9.8 percent; and in 1935-36 it came to 16.9 percent.

(e) Nonsalaried service.--Included among the 37 million dollars of private gifts and grants for current and capital purposes is nonsalaried service valued by the 170 institutions receiving it at a total of \$6,626,715.

This is 9.0 percent more than in 1933-34, when \$6,077,877 was reported by 160 institutions. The amount reported by 141 institutions in 1931-32 was \$5,102,905.

Details of the contributions of this type in 1935-36 are found in table L.

(f) Auxiliary enterprises and activities.--Receipts from all auxiliary enterprises and activities totaled \$106,479,162. These included athletics, boarding and rooming houses operated by the institutions, student unions, student infirmaries, and similar extracurricular activities.

COMPARISONS OF AMOUNTS OF INCOME FROM THE SEVERAL SOURCES

Percentage analyses of educational and general receipts of all institutions of higher education, classified by type, control, and level, are presented in table 4.

One particular trend in connection with college and university finances seems of unusual importance. That trend has to do with the relative importance of the several sources from which income is derived. To reveal that trend from 1925-26 to 1935-36 table M has been prepared. The institutions are divided into the two classes--publicly controlled and privately controlled.

In this table it will be observed that the percentage of income derived from student fees in publicly controlled institutions rose from 13.5 to 16.2 percent during the 10 years, while the amount received from State and local governments decreased from 59.7 to 52.6 percent. Thus, the decrease in public support is partially made up by the increase in student fees.

In the privately controlled group it will be observed that the percentage derived from student fees increased from 47.0 to 49.5 percent, but the income from endowment dropped from 25.3 to 22.9 percent. This amount

was more than compensated for in the increase in private gifts and grants from 8.8 to 14.1 percent.

When all of the institutions are combined, it is observed that students are paying 2.9 percent more of the support than they did 10 years ago, while the State is paying 2.1 percent less of the support; and the institutions are getting from private gifts and grants 2.9 percent more than they did 10 years ago.

This trend may be very significant. Even though the percentage of re-

¹Including educational and general, noneducational, and other nonre-volving funds.

ceipts from the Federal Government has nearly doubled, the time-honored American boast that education is free from the kindergarten through the university seems not to be as true as it once was.

EXPENDITURES

(a) Educational and general.--Educational and general expenditures, as reported by 1,540 institutions, totaled \$419,882,833 in 1935-36. This is \$50,221,756 or 13.6 percent more than the amount reported in 1933-34 by 1,327 institutions. Increases are reported in all of the items as follows: Administration and general control, 11.4 percent; resident instruction: Colleges, schools, and departments 10.7 percent; related activities 43.0 percent; Organized research 29.5 percent; extension 47.0 percent; libraries 16.0 percent; operation and maintenance of the physical plant 11.3 percent.

Percentage analyses of the educational and general expenditures in degree-granting universities, colleges, and professional schools are given in table N. Amounts of these same expenditures, excepting extension, are presented in table 4.

(b) Capital outlay.--Expenditures under this heading were in 1935-36: For buildings and grounds \$39,605,904; for equipment \$7,763,503; total \$47,369,407. This may be compared with the 1933-34 total of \$29,502,932.

RECEIPTS FOR INCREASE OF PERMANENT FUNDS

Receipts intended for increase of endowment and other permanent funds of the various institutions over the country totaled \$47,038,548, which represents an increase of 71.2 percent over the \$27,479,968 reported in 1933-34. Of the 1935-36 total, 22.1 percent went to institutions under public control and 77.9 percent to institutions under private control.

PROPERTY

(a) Library books.--Nearly 63 million bound volumes are reported in the libraries of 1,362 institutions of higher education over the country for the year ending June 30, 1936. Of the total number reported, 38.0 percent are at publicly controlled institutions and 62.0 percent are at institutions under private control. This division contrasts with that of student enrollment, wherein 50.8 percent of all students are at publicly controlled institutions and 49.2 percent are at those under private control.

(b) Buildings, grounds, and equipment.--The buildings, grounds, and equipment used primarily for educational purposes were valued at a total of \$2,359,418,489 in 1936. Of this amount, 41.6 percent was held by publicly controlled institutions and 58.4 percent by institutions under private control. The total represents an increase of 4.7 percent over that reported in 1934.

(c) Endowment, annuity funds, loan funds, and other permanent funds.--In 1936 the amount of these funds totaled \$1,625,105,000, which represents

an increase of 5.4 percent over the \$1,539,727,565 reported in 1934.

VARIATIONS AMONG STATES

In the preceding pages attention has been called to the more significant figures in the national totals of receipts and expenditures for higher education. While such national totals have significance, it must be remembered that in the United States, education is primarily a State function rather than a Federal function. It seems appropriate, therefore, to give some figures that will help to reveal to the several States some rough measure of their respective loads and contributions in higher education.

(a) Ratio of adults to college age youth.--The number of young people to be educated is one measure of the educational need in any State. But the number of adults per young person is, in general, a measure of the productive capacity available to meet that need. Table O gives the basic figures on population, and the number of adults per youth in each State. The total population figures for noncensus years in this and in all subsequent tables are the estimates made by the Bureau of the Census, and the estimates of the numbers 18 to 21 have been calculated by the Office of Education from corresponding figures available in the 1930 census figures.

From this table it will be noted that California has 9.12 adults per youth, South Carolina has only 5.21 adults per youth, Oregon has 8.87 adults per youth, while Utah has 6.21. Such variations as these must be taken into account when examining data concerning higher education in the several States.

(b) The States with separate schools and colleges for Negroes.--Because of the peculiar problem which results from the maintenance of separate schools and colleges for Negroes, it seems desirable to present the population figures for the two races separately in those seventeen States and the District of Columbia which maintain separate colleges for Negroes. This is done in table P.

While the ratio of adults to youth is greater for whites than for Negroes in most Southern States, the difference is not very great. If Delaware, the District of Columbia, Florida, Kentucky, Maryland, and Missouri be excepted, the ratio for whites is less than seven adults to each youth in all the other Southern States, whereas there are 17 States in which the ratio for the total population is more than eight adults per youth.

(c) Students per thousand youth in the population.--While it is well recognized that institutions located in any State are not attended only by students residing in that State, it is significant to note the extent of differences among the States in respect to the numbers of students enrolled in the institutions located within their borders. Table Q gives these figures for each State. Note that Delaware has only 46 students per thousand youth while Utah has 256, more than five times as many. Connecticut has 83; Massachusetts, 170; New Jersey, 58; and New York, 189. Even though these States have distinguished institutions which draw students from all over the country, their students do not outnumber many of the other States, the institutions in which are mainly local in their appeal. This comment is not intended as disparaging to those States which are educating in colleges and universities either the larger or the smaller proportion of their young people. It is merely to bring out the fact that there are wide differences among the States.

TABLE O.—ESTIMATED POPULATION, ALL RACES, 1936

(d) Public support of higher education.--How much ought a State contribute from public funds toward higher education? That is a question asked by many State officers. Naturally there are many factors which must be taken into account when answering the question, but it is instructive to know how much each of the States does contribute. Table R gives the amount of public funds contributed in 1935-36 by each State divided by the number of persons 18 to 21 years of age in the State.

This table brings out clearly the difference in the public policies practised in the several States. In general, the Western States depend more largely upon publicly supported institutions and contribute annually from \$20 to \$30 per youth 18 to 21 years of age in the State toward the support of higher education. States which foster strong privately controlled institutions contribute much less--Connecticut, \$5.28; Massachusetts, \$7.64; New Jersey, \$8.49; New York, \$5.28, and Pennsylvania, \$7.42.

(e) Expenditures of publicly controlled institutions.--In addition to the amount of State support, it is important to know what the total educational and general expenditures of the publicly controlled institutions are in the several States. These figures are given in table S.

This table indicates in a general way the relative emphasis placed upon publicly controlled higher education in the several States. When studied in conjunction with table R, it also reveals the relative proportions of public funds and other support which go into the expenditures of publicly controlled institutions.

In some States, the conception of public control carries with it public support. For example, in Colorado, for each \$44.77 spent by publicly controlled institutions for educational and general purposes, \$27.66 or 62 percent was appropriated by the State for educational and capital purposes combined. About the same proportion holds for a number of other States such as California, Florida, Iowa, Minnesota, Oregon, Washington, and Wisconsin.

In contrast with these States, note that in Alabama, for example, for

Mississippi.....	5.61	Wisconsin.....	26.63
Missouri.....	10.78	Wyoming.....	21.02

each \$13.86 spent for educational and general purposes, by publicly controlled institutions, only \$2.03 or 22 percent was appropriated by the State. Similar low proportions are found in other States such as Georgia, Mississippi, and Tennessee. The assumption that public control carries with it public support holds in widely varying degrees in the several States.

(In comparing table R with table S, it will be remembered that table R is based upon total State appropriations, including building funds, while table S is based on only educational and general expenditures excluding buildings. Therefore in a State where large appropriations are made for buildings the item in table R may approach or even surpass in size the item in table S. Note Louisiana as an illustration.)

¹ These States in particular and some other States to a lesser degree make public appropriations to certain privately controlled institutions; such institutions are not included in these computations but are in table R.

(f) Expenditures in all institutions combined.--Higher education in the United States is a dual system comprising publicly controlled and privately controlled institutions. But both types of institutions work for essentially common purposes. Both types must be combined when the State's facilities in higher education are being considered.

Therefore, table T was compiled to show the total educational and general expenditures by all the institutions of higher education in each State per youth 18 to 21 in the State. Two factors tend to accentuate the variations shown in this table. First, the presence in a State having only small population, of one or more institutions with heavy expenditures. New Hampshire is an illustration. Second, the location in a State of institutions which draw large numbers of students from other States. Even when the figures are discounted for these two factors, however, there remain very great differences. These probably reflect in a measure the differences in higher educational opportunity available in the several States.

ABILITY TO PAY THE COSTS OF HIGHER EDUCATION

There are many factors which enter into the State's ability to meet the costs of its institutions of higher education. Some of these factors help to explain the wide variations among the States revealed by the foregoing tables. Not all these factors can be isolated, but three arrays of facts would seem to be worth recording here so as to shed what light they will upon why the States vary so widely in their programs of higher education. These arrays of facts have to do with accountable income, Federal income taxes paid, and Federal relief distributed.

(a) Accountable income.--The agency believed by many to collect the most reliable data on income is the National Industrial Conference Board. The figures published by this board as an estimate of the total accountable income in the several States are reproduced in Table U. Figures for two separate years, 1929-30 and 1935-36, are included in order to show what States, if any, have shifted materially their positions in the rank order of States during the 6-year period. The total income figures are divided by the number of youth 18 to 21 in the States. The table lists the States in order of the accountable income in 1935-36 per youth 18 to 21. In column 5 of the table is given the rank order of States in 1929-30.

While there are a few notable exceptions, such as Montana (from 23rd to 12th), the rank order of States is about the same for both years. The variations revealed in either column 4 or column 8 may, therefore, be noted as an indication of the difference in financial ability to support a system of higher education. The highest ranking 10 States average more than \$9,000 of accountable income per year per youth 18 to 21 years of age, while the lowest ranking 10 States average less than \$3,000, only a third as much as the highest 10 States.

(b) Federal income taxes paid.--One measure of the income received by the more prosperous individuals and corporations is the Federal income taxes paid. These individuals and corporations are not only the source of their share of public tax income for the State but they are the principal donors to institutions of higher education. In addition, therefore, to recording the per capita Federal income tax collections by States, there is also recorded in table V the amounts of private gifts and grants received by institutions of higher education during 1935-36. Of course it is well known that not all gifts to a given college come from donors living within the State where a college is located. On the other hand, there should be some relation between the availability of wealth within a State and the amount of gifts received by the institutions in that State.

The placing of the data about gifts in table V should not be allowed to obscure the main purpose of the table which is to show the wide variation in the income tax per capita collected in the several States. Delaware stands first with \$44.02 per capita. North Dakota stands last with 27 cents per capita. Thirteen States stand above \$5.00 per capita while 9 States stand below \$1.00.

(c) Relief funds.--The third array of data relate to the extent of Federal relief funds given to the several States. It is obvious that there is no close relationship between the emergency relief needs of a State and its inability to support higher education. Relief clients are not, generally speaking, the persons who contribute largely to tax collections, or to tuition fees. On the other hand, the general economic condition which determines the extent of relief needs might be expected to

be reflected somewhat in expenditures for higher education even though the program of higher education is carried on through colleges and universities whose budgets cannot fluctuate widely from year to year without great injury to their effectiveness.

At any rate, the question is frequently asked as to the relative amounts of Federal relief funds going to the several States. The information is here made available in table W. If considered along with the "accountable income" and the Federal income tax collections by States, it may help each State to appraise more justly its own efforts to provide higher education facilities for its own people.

-oOo-

The foregoing pages call attention to only a few of the significant facts contained in the tables which make up the main body of this report. Certain data from noneducation sources have been reproduced to aid in discovering the fuller meaning of some of the statistical tables regarding higher education. It is well recognized, however, that the few interpretations herewith reported can do no more than merely to suggest the many types of studies which the data in the statistical tables make possible.

1/ Including 2 designated as M. N. D. in one institution.

2/ Bachelor of arts, 3; associate doctor of science in ophthalmology, 1; doctor of commercial science, 1; master of dental surgery, 1; doctor of foreign service, 1; master of pharmacy, 1.

3/ Master of fine arts.

4/ Doctor of diplomacy.

5/ Master of fine arts, 2; doctor of both (civil and civil) law, 1; doctor of optometrical sciences, 2.

6/ Master of education, 1; master of music, 2; doctor of pharmacy, 1.

7/ Master of engineering, 1; master of law, 3; master of science, 1; master of science in business administration, 1; master of science in accountancy, 1.

8/ Not designated.

9/ Mechanical engineer.

10/ Master of pedagogy, 1; doctor of Hebrew literature, 1; master of law, 1; master of literature, 1.

11/ Doctor of Hebrew law, 1; bachelor of arts, 2; civil engineer, 1; master of music, 2.

12/ Doctor of arts.

13/ Doctor of fine arts, 1; master of pharmacy, 3; doctor of jurisprudence, 1.

14/ Bachelor of philosophy.

15/ Master of law.

16/ Civil engineer.

17/ Doctor of commercial science.

18/ Doctor of philosophy.

19/ Master of science in social service, 1; doctor of fine arts, 1.

TABLE 19.—STUDENTS AND DEGREES IN PROFESSIONAL SCHOOLS, 1935-36—Continued
Part 2.—Privately controlled professional schools—Continued
Footnotes

1. Negro.	33. Fine arts students 145; journalism students 123; degrees 11; music students 203; degrees 13; religious education and social work students 233; degrees 13; physical therapy students 29.	66. Sacred music students 10; degrees 1; religious education students 27; degrees 7; unclassified students 13.
2. Mechanical/industrial students 177; degrees 11; physical education students 241; degrees 3; music students 24; degrees 1; unclassified students 35.	34. Literary interpretation.	67. Chemistry.
3. Science students 271; degrees 65; unclassified students 199.	35. Architecture students 78; degrees 30; public health students 32; degrees 29.	68. Science students 107; degrees 30; unclassified students 29.
4. Dietetics.	36. Social science division students 117; degrees 29; natural science division students 398; degrees 80.	69. Music students 150; degrees 1; dental hygiene students 14; degrees 1; dental hygiene students 14.
5. Architecture students 145; degrees 22; fine arts degrees 9; journalism students 99; degrees 24; music students 69; degrees 11.	37. Architecture students 100; degrees 31; unclassified students 528; degrees 134.	70. Architecture students 7; degrees 35; fine arts students 14; degrees 7; music students 22; degrees 3; oral hygiene students 20; degrees 1; dental hygiene students 179; degrees 34; unclassified students 213; degrees 16.
6. Fine arts students 121; degrees 8; library science students 146; degrees 15; science students 58; degrees 6; medical technology students 36; degrees 3.	38. Podiatry.	71. Dental education.
7. Architecture students 94; degrees 16; fine arts students 274; degrees 39; forestry students 33; degrees 20; music students 20; degrees 15; unclassified degrees 4; degrees 9; social work students 60; degrees 11.	39. Architecture.	72. Biblical education.
8. Architecture students 36; degrees 9; social work students 60; degrees 11.	40. Journalism.	73. Architecture students 14; degrees 11; physical education students 93; degrees 10.
9. Fine arts students 10; degrees 15; library science students 54; degrees 19; dental hygiene students 114; degrees 26.	41. Architecture students 18; degrees 9; social work students 69; degrees 35.	74. Religious education students 11.7; degrees 13; sacred music students 79; degrees 1.
10. Fine arts students 10; degrees 15; library science students 54; degrees 19; dental hygiene students 114; degrees 26.	42. Journalism students 65; degrees 26; library science students 16; degrees 16; degrees 17; music degrees 13.	75. Dental technology.
11. Music students 197; dental hygiene students 9.	43. Philosophy and science students 81; social service students 182; degrees 19.	76. Library science students 15; degrees 14; music students 14; degrees 7; trade teaching students 8; degrees 5; building construction students 14; degrees 3; trade school students 157.
12. Library science.	44. Architecture students 18; degrees 9; social work students 69; degrees 35.	77. Music students 141; institute of paper chemistry students 30; degrees 11.
13. Figures for 1933-34.	45. Journalism students 65; degrees 26; library science students 16; degrees 16; degrees 17; music degrees 13.	78. Speech students 22; degrees 5; journalism students 17; degrees 24; dental hygiene students 30.
14. Architecture students 110; degrees 19; science students 7.	46. Christian education students 57; degrees 15; unclassified students 50.	
15. Fine arts.	47. Architecture students 69; degrees 17; journalism students 71; degrees 61; library science students 376; degrees 179; forestry students 94; degrees 17; unclassified students 240.	
16. Music students 1,426; degrees 16; dramatic art students 24; degrees 1.	48. Includes hotel training.	
17. In this and several other schools of the same type the enrollment of regular college students only has been used and pupils of elementary and high school age and grade have been omitted.	49. Architecture students 157; degrees 32; fine arts students 3; degrees 3; forestry students 3; degrees 1; veterinary students 131; degrees 23; unclassified students 43; degrees 3.	
18. Fine arts students 29; music students 196; degrees 21; unclassified students 433.	50. Unclassified.	
19. Group work students 61; degrees 11; physical education students 43; degrees 12.	51. Architecture students 169; degrees 37; retailing students 595; degrees 74.

PART V. STATISTICS OF NURSE-TRAINING SCHOOLS, 1935-36¹

Statistics of nurse-training schools have been gathered by this Office at various times since 1879. In that year 11 schools of this type reported 298 students, 141 of whom were graduated. In 1935-36 the number of schools reporting was 1,381, more than a hundred times the first number. The number of students was just under 80,000 and the number of graduates was a little more than 19,000.

In his annual report for 1880, the Commissioner of Education said,

"The history of nurse-training schools in America belongs chiefly to the last decade, although two or three schools were chartered and established at earlier dates. More than half the existing schools were incorporated or organized in 1872 and 1873."

The tables here presented show that the number and enrollment of schools increased steadily up to 1930-31, but that there has been a decline since that date.

SCHOOLS

The report for 1935-36 includes data for 463 fewer schools than were reported in 1930-31, which represented the high year in nurse-training schools reporting. Percentage decreases during the 5-year period are: in number of schools, 35.1; in number of students, 21.1; and in number of graduates, 25.9. When total number of students is compared with total number of schools there will be noted a steady increase in size of individual schools from 1915 on. In 1935-36 the average number of students per school was more than twice the average for the earlier year. Data on the number of schools reporting at different periods since 1879 are presented in table X, and the number of schools in each State in 1935-36 is given in table 24.

STUDENTS

The 1935-36 data show 79,149 students in training for the nursing profession, a decrease of 21,270, or 21.2 percent, from the number reported in 1930-31. Of the total number of students, only 0.88 percent are men.

Of the 77,099 students in general hospitals, 336 or 0.44 percent, were men, but of the 1,688 students connected with hospitals for the insane 362, or 21.44 percent, were men. Training courses for men nurses were reported by 42 general hospitals and 23 hospitals for the insane; these numbers are the same as were reported in 1930-31.

Data at hand do not make possible the elimination of duplicate enrollments between this part and the preceding parts of this chapter, where 6,398 students in nurse-training are reported by universities and colleges. Probably a large number, perhaps nearly all, of these students are also included in the 79,149 students here reported.

GRADUATES

There were 19,256 graduates from schools for nurses in 1935-36. Of this number, 539 were trained in hospitals for the care of the insane. Of the 180 men graduates, 92 were from general hospitals and 88 from hospitals for the insane.

¹Tabulations for this part were made by Mrs. Freda S. Hames.

TABLE X.--COMPARATIVE STATISTICS OF NURSE-TRAINING SCHOOLS, 1879-1936

Year	Schools	Nurse-students	Graduates	Average number of students per school
1	2	3	4	5
1879.....	11	298	141	27.1
1880.....	15	323	157	21.5
1884-85.....	34	793	218	23.3
1889-90.....	35	1,552	471	44.3
1894-95.....	131	3,995	1,498	30.4
1899-1900...	432	11,164	3,456	25.8
1904-05.....	862	19,824	5,795	23.0
1909-10.....	1,129	32,636	8,140	28.9
1914-15.....	1,509	46,141	11,118	24.0
1919-20.....	1,755	54,953	14,980	31.3
1926-27.....	1,797	77,768	18,623	43.3
1930-31.....	1,844	100,419	25,971	54.5
1935-36.....	1,381	79,149	19,256	57.3

LENGTH OF COURSE

The standard length of the nurse-training course in general hospitals is now 3 years. The tendency toward this length of course is shown by the fact that in 1926-27 only 85.6 percent of the schools reporting had 3-year courses, in 1930-31 the percentage was 89.7 and in 1935-36 it stood at 96.9. Of special interest is the sharp increase in number of schools requiring 4 years or more--from 2 schools in 1931 to 36 in 1936--shown in the last line of table Y. Detailed tabulations which form the basis of this table show that the majority of these schools offer courses of 5 years and are affiliated with universities or colleges. In these instances the course leads to both the bachelor's degree and the registered nurse title.

EDUCATIONAL REQUIREMENTS FOR ADMISSION TO NURSE-TRAINING COURSES

The steady increase in educational requirements for admission to nurse-training courses continued from 1930-31 to 1935-36. In 1926-27 one-third required completion of the high school, one-third 2 or 3 years of high-school work, and the other third 1 year or less of high-school work. In 1930-31, 86.17 percent or six out of seven required the completion of a high school course. By 1935-36 the percentage had risen to 96.67.

SUMMARY TABLES

Comparison between States can be made from table 24 which summarizes by States and for the Nation as a whole data on schools, graduates, and teaching staff of nurse-training schools for the year under review. The table is in two parts, one dealing with general nurse-training schools and one with schools connected with hospitals for the insane.

TABLE 1.—DISTRIBUTION OF NURSING-TRAINING SCHOOLS ACCORDING TO LENGTH OF COURSE OFFERED

1/ Previous training in nursing required for these special schools.

2/ Data not available.

In table 25 data are presented on expenditures for the 918 schools which reported these items. The total amount reported is \$5,772,468, of which \$1,502,535 was for capital outlay of various sorts. Of the remainder, \$2,776,365 was spent for instructional salaries and \$1,503,568 was for other expenses of instruction.

PART VI. LAND-GRANT COLLEGES AND UNIVERSITIES, 1934-35 and
1935-36

By Walter J. Greenleaf¹
Specialist in Higher Education

Preliminary reports concerning the 69 land-grant colleges and universities are published annually on November 1 for the preceding fiscal year ending June 30. Two of these reports--Circular 149 for the year 1934-35, and Circular 168 for the year 1935-36--have been revised and edited to form this chapter. Column headings in the following tables are self-explanatory.

Faculties.--One-fourth of all faculty members in higher educational institutions in the United States in 1935-36 were employed in the land-grant colleges and universities--28 percent of the men and 18 percent of the women.

Faculty salaries.--Two separate publications have been issued by the Office of Education containing data on salaries paid in land-grant institutions: Circular 157, "Salaries in Land-grant Colleges, 1935"; and Bulletin, 1937, No. 9, "College Salaries, 1936".

Enrollments (1936).--One-sixth of all college students in the United States were enrolled in the land-grant institutions in 1936--20 percent of all college men and 12 percent of all college women. The ratio of college men to college women in all colleges and universities was 59 to 41 compared with the ratio in the land-grant institutions of 71 to 29. Of all undergraduate students registered in arts and sciences in all of the colleges and universities of the United States, 12 percent were enrolled in the land-grant institutions.

First degrees (1936).--One-fifth of all first degrees (baccalaureate and first professional) granted in 1936 were awarded in the land-grant institutions--23 percent of all first degrees to men and 16 percent of all first degrees to women.

University of Alaska.--On July 1, 1935, the Alaska Agricultural College and School of Mines became the University of Alaska through Territorial legislation.

Bankhead-Jones funds.--On June 29, 1935, the Bankhead-Jones act was passed authorizing new funds to be appropriated annually to the land-grant institutions. A part of the Act is as follows:

AN ACT

To provide for research into basic laws and principles relating to agriculture and to provide for the further development of cooperative agricultural extension work and the more complete endowment and support of land-grant colleges.

¹Assisted by Maude Farr, statistical clerk.

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

TITLE I

Sec. 1-20. (Applies to funds supervised by the U. S. Department of Agriculture.)*****

TITLE II

Section 21. In order to further develop the cooperative extension system, etc. (Supervised by the Department of Agriculture.)*****

Section 22. (Supervised by Department of the Interior.) In order to provide for the more complete endowment and support of the colleges in the several States and the Territory of Hawaii entitled to the benefits of the Act entitled "An Act donating public lands to the several States and Territories which may provide colleges for the benefit of agriculture and the mechanic arts", approved July 2, 1862, as amended and supplemented (U. S. C., title 7, secs. 301-328; Supp. VII, sec. 304), there are hereby authorized to be appropriated annually, out of any money in the Treasury not otherwise appropriated, the following amounts:

(a) For the fiscal year beginning after the date of the enactment of this Act, and for each fiscal year thereafter, \$980,000; and

(b) For the fiscal year following the first fiscal year for which an appropriation is made in pursuance of paragraph (a) \$500,000, and for each of the two fiscal years thereafter \$500,000 more than the amount authorized to be appropriated for the preceding fiscal year, and for each fiscal year thereafter \$1,500,000. The sums appropriated in pursuance of paragraph (a) shall be paid annually to the several States and the Territory of Hawaii in equal shares. The sums appropriated in pursuance of paragraph (b) shall be in addition to sums appropriated in pursuance of paragraph (a) and shall be allotted and paid annually to each of the several States and the Territory of Hawaii in the proportion which the total population of each such State and the Territory of Hawaii bears to the total population of all the States and the Territory of Hawaii, as determined by the last preceding decennial census. Sums appropriated in pursuance of this section shall be in addition to sums appropriated or authorized under such Act of July 2, 1862, as amended and supplemented, and shall be applied only for the purposes of the colleges defined in such Act, as amended and supplemented. The provisions of law applicable to the use and payment of sums under the Act entitled "An Act to apply a portion of the proceeds of the public lands to the more complete endowment and support of the colleges for the benefit of agricul-

ture and the mechanic arts established under the provisions of an Act of Congress approved July second, eighteen hundred and sixty-two", approved August 30, 1890, as amended and supplemented, shall apply to the use and payment of sums appropriated in pursuance of this section.

Approved, June 29, 1935. (Public, No. 182--
74th Congress) (H. R. 7160)

SUBJECT MATTER FIELDS ALLOWED. These Federal funds are to be applied only to instruction in--

A. Agriculture.--Agriculture, horticulture, forestry, agronomy, animal husbandry, dairying, veterinary science, poultry industry, apiculture, etc.

B. Mechanic arts.--Mechanical, civil, electrical, irrigation, mining, marine, railway, and experimental engineering; textile industry, farm mechanics, architecture, machine design, mechanical drawing, ceramics, stenography, typewriting, printing, shop work, drawing, etc.

C. English language.--English language, English literature, composition, rhetoric, and oratory, etc.

D. Mathematical sciences.--Mathematics, bookkeeping, and astronomy, etc.

E. Natural and physical sciences.--Chemistry, physics, biology, botany, zoology, geology, mineralogy, metallurgy, entomology, physiology, bacteriology, pharmacy, physical geography, meteorology, etc.

F. Economic sciences.--Political economy, home economics, commercial geography, sociology, etc.

G. Special preparation of teachers.--Subjects with special reference to agriculture, mechanic arts, and home economics: History of industrial education, methods and special instruction for teachers. All or a part of the funds provided by the act of March 4, 1907, may be used "for providing courses for the special preparation of instructors for teaching the elements of agriculture and mechanic arts." It is held that this language authorizes expenditures for instruction (a) in history of agriculture and industrial education, (b) in methods of teaching agriculture, mechanic arts, and home economics, and (c) for special aid and supervision given to teachers actively engaged in teaching agriculture, mechanic arts, and home economics in public schools.

Fields NOT authorized.--No part of the above-mentioned funds may be used for any form of extension work, and all instruction must be given at the institutions receiving these funds, except that a reasonable portion of the fund provided by the act of 1907 may be used for the instruction of teachers in agriculture, mechanic arts, and domestic science at summer schools, teachers' institutes, and by correspondence, and in supervision and directing work of these subjects in high schools.

Expenditures are NOT authorized for courses in--

Ancient languages	History of education	Pedagogy
Civil government	Logic	Philosophy
Ethics	Methods of teaching	Psychology
Extension work	Military science and	Research
History	tactics	
	Modern languages	
	(except English)	

SALARIES. These funds may be used for the payment of salaries of instructors in the allowed subjects only.

When an administrative officer also gives instruction in any of the branches of study mentioned in the act of August 30, 1890, or when an instructor gives such instruction and also devotes part of his time to giving instruction in branches of study not mentioned in the said act, ONLY A PART of such person's salary proportionate to the time devoted to giving instruction in the branches of study mentioned in the said act can be charged to these funds. In the division of time between instructional and other services, one hour of instruction shall be regarded as equivalent to two hours of administrative, supervisory, or experiment-station work.

Salaries NOT authorized. The salaries of purely administrative officers, such as treasurers, presidents, secretaries, bookkeepers, janitors, watchmen, superintendents, foremen, matrons, unskilled laborers,

assistants in shops, laboratories and fields, experiment-station staff; instructors employed in research work or in collecting, classifying, and arranging specimens, collections, or exhibits; instructors in philosophy, psychology, ethics, logic, history civil government, pedagogy, military science and tactics, ancient and modern languages (except English); and in extension work, cannot be charged to these funds.

Nor may the funds be used for the salaries of instructors improperly trained or incompetent for the positions they are supposed to fill.

FACILITIES. Purchases are authorized from these funds for apparatus, machinery, textbooks, reference books, stock, and material used in instruction, or for purposes of illustration in connection with any of the allowed subject-matter fields. The nature of materials purchased must be shown.

In case of machinery (such as boilers, engines, pumps, etc.) and farm stock, which are made to serve for both instructional and other purposes, the Federal funds may be charged with only an EQUITABLE PORTION of the cost of said machinery and stock.

Facilities not authorized. No portion of said moneys shall be applied directly or indirectly, under any pretense whatever, to the purchase, erection, preservation, or repair of any building or buildings (Act of 1890, sec. 3), nor for the permanent improvement to buildings, grounds, and farms, such as clearing, draining, and fencing of land, nor for the heating or lighting of buildings, nor for musical instruments, military equipment, furniture, cases, shelving, desks, blackboards, tables, lockers, etc.

The purchase of land is not allowable. (Ruling March, 1891.)

THE SPOON (52 institutions for white students)

5/ Envelopes duplicates of 602 exam.
5/ Engrs, students are practically all in school of arts and sciences.

TABLE 12.--DEGREES: FIRST (BACHELOR'S) AND ADVANCED DEGREES CONFERRED, YEAR ENDED JUNE 30, 1935

[illegible]

YEAR SUMMIES (52 institutions for white students)

Degrees in arts and sciences in 17 Negro colleges are not detailed.
Those included with men.

- 1/ Enrollments are for arts and sciences.
- 2/ Engineering undistributed.
- 3/ Includes graduates of 2,716 men.
- 4/ Includes graduates of 3,097 women.
- 5/ Detailed in table 10. Students.

1/ Includes 1 woman.
2/ Includes 2 women.
3/ Totals in engineering include women. See footnotes above.
4/ Degrees granted in Negro colleges not detailed.

Land-grant Institutions

[illegible]

13/ Details of Colleges 79, 31 and 36 include degrees for men; total of Colleges 44 includes degrees for women. See footnotes above.
14/ Includes 773 master's degrees not detailed; also includes 15 "certificates in social work," 5 years beyond degree in University of Puerto Rico.
15/ Includes 27 doctor's degrees not detailed.

TABLE 43.—RECEIPTS, YEAR ENDED JUNE 30, 1936

1/ Military funds not reported by all institutions.
2/ Includes a few other funds than actual grants by PUL.
3/ Temporary funds from PUL, PVA, ADM, ARA, etc., not included elsewhere in this report.
4/ This total minus totals columns 2 and 3.
5/ Same as total in column 4 of table 5.

✓ Military funds not reported by all institutions.

22/ Includes a few other funds than actual grants by FIA.

Temporary funds from FIA, FPA, AA, FA, etc., not included elsewhere in this report.

4/ This total minus totals columns 2 and 3, equals total in column 4 of Table 5.

TABLE 47.—SUPPLEMENTARY MORRILL FUNDS
 Receipts and expenditures of funds received under acts of Congress approved
 August 30, 1890 (Second Morrill Act), March 3, 1907, (Wilson Amendment), and
 June 29, 1935, (Sec. 22, Bankhead-Jones Act), for year ended June 30, 1936

Land-grant institution located in	Per- cent to in- stitution	Interest on land granted to U. S. Treasury	Appropriation, year ended June 30, 1936	Receipts 1935-36		Expenditures 1935-36			Balance on hand July 1, 1936
